In reviewing the videos of the Passion to Action Youth:

- What was the common theme that all youth presented about permanency?
- In reflecting on your work, would you make changes in how you approach children/youth on your caseload during monthly health and safety visits to engage them about permanency planning?

Have you thought about the **biases** that you have in working with our families? Do the **guiding principles** outlined in the eLearning, conflict with any of your biases?

**What is the Best Permanency Plan? (using the case scenario)**

- Do you agree with the plan to place all three children together for adoption?
- What alternative plans should be worked while considering the former foster family as an adoptive resource?
- What are the pros and cons of alternative plans for these three children?
- Are there parallels with any cases you currently have on your caseloads?

Let’s staff a case.
