Mentor 1 has taken the time to understand Mentee 1’s primary strengths and weaknesses (via the use of a Strengths Assessment)

Mentor 1 helps Mentee 1 create an action plan for putting her strengths to work within the Department and for marketing her strengths when she enters the job market
Mentoring Scenario 2

- Mentee 2 exhibits signs of the “imposter syndrome”: he is concerned about his competence and his ability to function as a graduate student and prospective faculty member.
- Mentor 2 has taken the time to understand the concerns of Mentee 2 and has shared his experiences and concerns as a graduate student (and how he ultimately resolved or learned to manage them). The mentoring relationship continues to serve as a buffer for clarification of roles and as a model for effective management of concern within the workplace.
Mentoring Scenario 3

- Mentee 3 is married and has three children. He worries about his ability to successfully balance his work and family life.
- Mentor 3 has recognized and validated the importance of family to Mentee 3 and has offered him tips on time management. The mentor has demonstrated to the mentee that he values every dimension of his own life and has shared his strategies for maintaining balance.
Mentor Scenario 4

- Mentee 4’s research group does not involve graduate students in the grant-writing process. However, Mentee 4 feels that this is an important part of his professional development.
- Mentor 4 is aware of Mentee 4’s concern and invites the mentee to a university-sponsored grant-writing workshop. She attends the workshop with her mentee and, afterward, she and the mentee have coffee and discuss the specific applications of the strategies discussed in the workshop to Physics.
Engage students in ongoing conversations
Demystify graduate school for students
Provide constructive and supportive feedback
Provide encouragement
Listen well
Provide stability and flexibility
Foster networks and multiple mentors
Basics of Good Mentoring (cont’d)

- Look out for students’ interests
- Treat students with respect
- Provide a personal touch
- Be honest, patient, and trustworthy
