

Configure VPN access on your personal PC or Mac

To configure VPN access on your personal PC or Mac, click the URL below and select the device you are using:

<https://networks.uwmedicine.org/content/sslvpn-frequently-asked-questions-pulse-secure>

IMPORTANT! You will initially receive an “Access Denied” error. Select the “Log in” link to the left of the Access Denied message and login with your UW NetID and password, then select the device you are using.
